Say Yes! to Success

Asbestos Awareness Training

Annual asbestos awareness training is mandatory for your employees who work in the field and may come into contact with asbestos products. There are literally thousands of products produced in the last 100 years that contain asbestos and could be a health hazard to your employees. The training is a minimum of two hours and covers the required information as specified by OSHA and MIOSHA. We will have scheduled classes in December as follows.

December 17th and December 19th, 2008

Classes will also be held in 2009. If you have a need, a special class can be arranged for your company. For further information, email Dan@SayYesToSuccess.com or call at 734-730-8110.
